

GLOBALTEK GmbH new Shareholder of WEBO Group

The shareholders families Wittig and Schuler of the WEBO Group have decided to strategically expand the group of shareholders to include the listed Taiwanese company GLOBALTEK.

Through a capital increase at the FormTechnology GmbH holding company, which holds all the shares of WEBO Group, GLOBALTEK immediately acquired 10% of the shares in the WEBO Group.

GLOBALTEK is also a partner in WEBO's joint toolmaking joint venture in China and has therefore been networked with WEBO in order processing for a long time.

GLOBALTEK is a global company with around 900 employees and specializes in component manufacture of casting parts, serial machining and series production for the automotive, industrial, medical and aviation sectors.
